

APPLICATION FOR PERMIT

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of first receipt and filing in State Engineer's office APR 24 1911
 Returned to applicant for correction _____
 Corrected application filed _____

The undersigned Orin W. Jarvis
Name of applicant.
 of Overton, County of Clark,
 State of Nevada, hereby make S application for
 permission to appropriate the public waters of the State of Nevada,
 as hereinafter stated. (If applicant is a corporation give date and
 place of incorporation.) _____

1. The source of the proposed appropriation is Muddy River
Name of stream, lake, or other source.

2. The amount of water applied ^{much thereof as the stream may contain} for is forty-five or as second-foot.
One second-foot equals 40 miners' inches.

3. The water to be used for Power and Manufacturing
Irrigation, power, mining, manufacturing, domestic, or other use.

4. The water is to be diverted from its source at the following
 point: At a point on Muddy River in NE 1/4 of NW 1/4 of Sec. 12,
Describe as being within a 40-acre subdivision of public survey, or by course and distance to a section corner. If on unsurveyed land it should be so stated.
Tp. 16 S.R. 67 E. Mt. Diablo Base and Meridian, known as Sparks &
Stringtown Dam.

IF THE WATER IS TO BE USED FOR IRRIGATION, SUPPLY THE FOLLOWING INFORMATION:

(a) Number of acres to be irrigated is _____

(b) Description of land to be irrigated _____
Describe by legal subdivisions, or if on unsurveyed land it

should be so stated and a description provided in accordance with special instruction from the State Engineer when application is returned for correction.

(c) Irrigation will begin about _____ and end about _____
Month.
 _____, of each year.
Month.

IF WATER IS TO BE USED FOR POWER, MINING, TRANSPORTATION, OR OTHER USE, SUPPLY THE

FOLLOWING INFORMATION:

thereof as the supply of water will permit.

(d) Power to be developed is 77, or as much, horse power.

(e) Works to be located at what is locally known as The Old Mill
Give 40-acre subdivision on which works will be located, or locate by course and distance to a section corner.
Site, east and, I believe, south of the center of Section 12,
Tp. 16 S. Range 67 E. Mt. Diablo Base & Meridian. Can tell you
later on which forty acre subdivision it is, but I am not sure
at present.

(f) Point of return of water to stream immediately below point
Describe in same manner as point of diversion.
 of use.

(g) Remarks I believe the point of use is situated in the NW 1/4
of SE 1/4 of Section 12, Tp. 16 S.R. 67 E. It is at the point
applied for by Joseph J. Cannon some time ago, but I believe he
has not complied with all the legal requirements, and is not
pushing any work. We need a mill here, and if he is not going to
build it, some of the rest of us, if given permission, can get one
put in. I want to make an application that will stick and if
this is not right in every particular, please send me a new blank
and tell me where to correct it.

DESCRIPTION OF PROPOSED WORKS

Water to be diverted by dam and conveyed by ditch, flume or other State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits. If water is to be conduit, and pipe to wheel for generating power to be used either stored in reservoirs it should be so stated and the location of the reservoir should be given with reference to the legal subdivisions. directly, as in operating flour or grist mills for grinding or crushing grain, or for generating electric power to be used either for lighting or general power purposes, such as running an artificial ice plant, canning factory or any other beneficial purpose for which power may be used or sold.

5. Estimated cost of works From seven to twelve thousand dollars,
6. Estimated time required to construct works Three years.
7. Remarks I cannot be as specific as I should like to be, as several points I have not received full information on. But our Valley is just in its formative period, and men competent to give accurate information on technical and engineering subjects have not yet located here, but if this application be favorably considered I shall get competent help to correct it, and draw Applicant.

ORIN W. JARVIS,

_____, Engineer.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This application is granted with the express provision that the applicant must at all time recognize the prior right of irrigators to the use of water, and must so divert the water that it will not, in any way, invade or injure preceeding rights of any nature.

A standard wier and head-gate must be installed as provided by law, to facilitate the measurement and control of water.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed Thirty five cubic feet per second.

Actual construction work shall begin on or before November 5th. 1912.

Proof of commencement of work shall be filed before December 5th. 1912.

Work must be prosecuted with reasonable diligence and be completed on or before November 5th. 1914.

Application of water to beneficial use shall be made on or before December 5th. 1914.

Proof of the application of water to beneficial use must be filed with the State Engineer on or before January 5th. 1915.

WITNESS MY HAND AND SEAL this 5th. day of October, 1912.

Proof of labor filed DEC -6 1912

Map filed APR -2 1913

Cancelled MAR 31 1914 because of failure of applicant to comply with provisions of permit.

W. H. Kearney
State Engineer.
